

MEMORANDUM FOR Department of Defense (DoD) Activities Authorized to Receive
Temperature Sensitive Medical Products (TSMP)

SUBJECT: Cold Chain Management (CCM) Educational CD-ROM Volume II

1. The Distribution Operations Center (DOC)/U.S. Army Medical Materiel Agency (USAMMA) in conjunction with the Military Vaccine Agency (MILVAX) is pleased to provide this second edition of our CCM educational CD-ROM as part of our training program. The CD-ROM contains the most current principles and procedures that are employed in the proper packing, shipping and storage of TSMPs.
2. The CD-ROM comprises a complete overview of CCM principles and procedures and five short technical videos covering the equipment used to store, pack and transport these products.
3. The distribution of TSMPs is a critical task; to accomplish this process successfully requires the integration of all Government agencies involved in the handling of these products. Cold Chain Management is the process of preparing TSMPs for shipment, utilizing approved systems and procedures while ensuring required temperatures are maintained throughout the supply chain.
4. To order this CD-ROM contact the DOC at (301) 619-3017, DSN: (343) or visit our web site at http://www.usamma.army.mil/html/ccm_vaccines.html
